

Proudly Serving Saskatchewan for 30 Years

Weatherblok XT & Ratak+ News

April 1st, 2026
Moose Jaw, SK

Weatherblok XT

Weatherblok XT is no longer being manufactured by Syngenta. It is now being manufactured by Neogen. As a result, it will no longer come in a case with two bags.

We only have a few cases of the original Weatherblok XT left. Once those are gone, all orders will be filled with Talon Weatherblok XT.

Our price sheet has been updated with Talon Weatherblok XT.

NEW Weatherblok XT

Now manufactured by **Neogen**

New name: **Talon Weatherblok XT**

New format: **7.2 kg pail**

✓ Registration number remains (21084)

✓ Blocks remain the same

Ratak+

Ratak+ packaging will also be changing, as the manufacturer will now be Neogen. This change unfortunately moves away from the smaller packaging option.

New name: **Talon G Mini Bait Packs**

New format: **Pail with 75 place packs**

✓ Registration number remains (16064)

We still have Ratak+ in stock and will continue selling it until we receive Talon G Mini Bait Packs.

If smaller packaging is what you are after, Jaguar 50 Place Packs is a great alternative to Ratak+.
